

# *Giaccone's* *Pizzeria & Restaurant*

**To Whom It May Concern:**

When I moved in to my restaurant had to buy some one out and buy the place as is.

Tables were a steak house table that were old and does not fit my place.

I contact "NY Wood Work" company that was recommended by other business associates.

I gave this company the idea of what I want as far as the design and size of the new tables I have vision.

I must admit how easy was to communicate with them which shows experience and professionalism , the amount of time that took them to be done with the job was so fast and good up to perfection.

I can say that since I have mate this company I give them all the wood work that has to be done nor in my business or my house.

Please be advised this company is "well recommended" by me.

**Sincerely,**

**Rod Nadiv**  
**president of Giaccones Pizza Restaurant.**
